Application for Internship/job

RANJAN infbit@gmail.com
to career2012

Jun 14

Hello,

My name is Sriranjana Rasakatla. I am a robotics and HCI researcher from IIIT-H India. I have done work in modular robots and human computer interfaces. I have also worked towards HRI in some of my projects. I believe I can contribute to the **research** program on ASIMO. I would also like to learn about building better servo motors and improve the torque efficiency at a given current, voltage and form factor. I have also developed a 33DOF robotic hand with magnetic spherical joints and I believe it is the robotic hand with highest degrees of freedom.

I am attaching my portfolio. Kindly let me know if I can join you either as an intern or for a job.

Regards
Sriranjana Rasakatla

Hi,

Thank you very much for your interest in the Microsoft Research intern program. We apologize for any confusion the on-line application form may have caused. Your application form is complete, meaning that we have received all the required supporting materials for you to be considered for an internship (CV, letters of reference, etc).

MSR employs interns year-round, so there is no specific date when interviews are completed. However, the majority of our summer positions are filled by the end of May. If a research group is interested in considering you for an internship, you will be contacted directly. Due to privacy restrictions, we will only retain your application for one year from the date of submission.

If you have any additional questions, please let us know.

Thanks,
MSR Internship Support - Redmond Lab

Hi,

Thank you for your enquiry. Microsoft Research offers internships of 12 weeks and longer primarily to students currently enrolled in graduate studies programs in Computer Science or related subjects. Our web site includes qualification information and worldwide lab locations. <http://research.microsoft.com/en-us/jobs/intern/apply.aspx>

Please apply via our on-line web application form (see link below). Emailed applications will not be considered.

<https://research.microsoft.com/apps/tools/jobs/intern.aspx>

Thank you very much for your interest in the Microsoft Research intern program.

Space X Internship

 **SpaceX Recruiting Team** notification@jobvite.com Aug 14 ☆ ↶ ▾
to me ▾

Dear Sriranjn,

Thank you for your interest in a career with SpaceX. We have reviewed your background and qualifications for the Internship/Co-op Fall 2012, Texas position. Unfortunately, after careful consideration, our teams have decided not to move forward with your **application** at this time.

We encourage you to continue to explore other opportunities within our organization. To better assist you in this process we have included some helpful guidelines below.

Hints and Tips:

- Limit your **applications** to the top 3-4 positions that best match your interests and qualifications; **applying** to multiple positions each with very different requirements can have a negative impact on your **application**.
- Emphasize your hands-on experience and overall breadth of responsibility; we build over 80% of our vehicles in-house, we have a very flat organizational structure, and almost all of our managers and directors are also individual contributors.
- Be sure your **resume** highlights your accomplishments not just your day-to-day job duties.
- If you have recently graduated be sure to highlight your academic achievements; we do not have a minimum criteria but it is an important evaluation factor.
- Where applicable, we recommend you including a portfolio of your design work along with your **resume**.

Once again, we appreciate the opportunity to review your qualifications and wish you success in your job search.

Sincerely,
SpaceX Talent Acquisition

Corning.

Dear Rasakatla, Sriranjn,

Thank you for your interest in pursuing a career with Corning. We have received your **application** for the following position(s) submitted on 2012-06-19:

170898-Controls Systems Engineer / Advanced Process Controls

In order to provide clarity and understanding, we would like to take this opportunity to share some information about our recruiting process with you.

Our recruiters will review your **resume** against the job requirements. If they determine that you meet the minimum requirements of the position they will route your **resume** to the hiring manager for review and may contact you for a phone interview to further assess your career interests and background.

After review of your **resume**, the hiring manager may choose to do a phone interview to evaluate your technical capabilities for the job. Depending on the results of this technical phone interview, an onsite interview may follow at which time you would meet the hiring manager and his team. If this interview is successful, an offer of employment will be extended.

If at any time during this process we determine that it will not be in either party's interest to pursue the opportunity, you will receive an e-mail from us informing you to that effect. We hope that this gives you some understanding of our hiring process.

To review your information, visit us at http://www.corning.com/careers/current_opportunities/index.aspx. Enter your user name and password and click on Log in.

Thank you again for your interest in working for Corning.

Sincerely,
Talent Acquisition
Corning Incorporated

Hi,

Here is my updated **resume**. This one is better than the previous one. My latest project includes an autonomous Snake robot which changes its gait as per terrain (first of its kind). And I designed a data glove using which one can control the Snake robot in a natural way.

Hope you like it.
